

Prospector Opportunity Fund (POPFX)

Portfolio information as of March 31, 2017

INVESTMENT OBJECTIVE

The investment objective of the Opportunity Fund is capital appreciation.

MAIN INVESTMENT STRATEGIES

Under normal market conditions the Prospector Opportunity Fund invests primarily in a variety of equity and equity-related securities both domestically and in other developed markets. The fund attempts to buy investments priced to generate long-term total returns significantly above those of general stock indices and U.S. treasuries. In pursuit of its value oriented strategy, the fund invests significantly in small-to-mid capitalization companies with market capitalizations at the time of investment in the range between \$150 million and \$15 billion. The Fund managers seek companies with long, consistent, predictable track records of free cash flow yield generation and healthy organic growth.

PERFORMANCE as of 03/31/17

	Average Annual Total Return					
	3 month	YTD	1 year	3 year	5 year	Since Inception (9/28/07)
Prospector Opportunity Fund	0.89%	0.89%	18.66%	9.35%	12.10%	9.19%
Russell Midcap Total Return Index	5.15%	5.15%	17.03%	8.48%	13.09%	7.79%
Russell 2000 Total Return Index	2.47%	2.47%	26.22%	7.22%	12.35%	7.25%

Performance data quoted represents past performance and does not guarantee future results. Investment returns and principal value will fluctuate, and when sold, may be worth more or less than their original cost. The Fund imposes a 2.00% redemption fee on redemption of shares held 60 days or less. Performance data does not reflect the redemption fee. If reflected, total return would be reduced. Performance current to the most recent month-end may be lower or higher than the performance quoted and can be obtained by calling 877-734-7862.

SECTOR ALLOCATION as of 03/31/17

QUICK FACTS

Cusip	743588204
Ticker	POPFX
Total Net Assets	\$107.8 million
Net Expense Ratio	1.31%
Number of Stocks	79
Number of Bonds	1
Annual Turnover Ratio as of 12/31/16	42%

Mr. Kish became a Portfolio Manager with Prospector Partners, LLC in 2013. Previously, Mr. Kish served as an Analyst since 1997 and became Director of Research in 2010. Mr. Kish worked as an auditor at Coopers & Lybrand from 1995 to 1997. Mr. Kish received a B.S.B.A. from Providence College in 1995. Additionally, he received his Certified Public Accountant designation in 2000 and his Chartered Financial Analyst designation in 2004.

INVESTMENT PROCESS:

- Attempt to maximize risk adjusted returns by looking at value from a credit perspective
- Deep dive research, focusing on regulatory and statutory statements when available, in addition to GAAP
- Balance sheets first, cash flow second, and income statements last
- Attention to market to market balance sheets and private market value for capital intensive businesses

IN-HOUSE RESEARCH:

- Avoid group think and the Wall Street middle man
- Sector-focused analysts perform proprietary analysis
- Detailed meetings with company managements that support original insights

IMPORTANT DISCLOSURES

Mutual Fund investing involves risk. Principal loss is possible. The Prospector Funds invest in small and medium capitalization companies that tend to have limited liquidity and greater price volatility than large capitalization companies. Growth stocks typically are more volatile than value stocks; however, value stocks have a lower expected growth rate in earnings and sales. The funds may invest in foreign securities which involve greater volatility and political, economic and currency risks and differences in accounting methods. Investments in debt securities typically decrease in value when interest rates rise. This risk is usually greater for longer-term debt securities. The funds use of derivative instruments involves the risk that such instruments may not work as intended due to unanticipated developments in market conditions or other causes.

The Russell Midcap Index, an unmanaged index, measures the performance of the 800 smallest companies in the Russell 1000 Index. The Russell 2000 Index consists of the smallest 2,000 companies in a group of 3,000 U.S. companies in the Russell 3000 Index, as ranked by market capitalization. One can not invest in an index. Frank Russell Company "Russell" is the source and owner of the trademarks, service marks and copyrights related to the Russell Indexes. Russell © is a trademark of Frank Russell Company. The Turnover Ratio indicates the percentage of the mutual fund's portfolio holdings that are bought and sold in a given year. Free Cash Flow Yield is an overall return evaluation ratio of a stock, which standardizes the free cash flow per share a company is expected to earn against its market price per share. The ratio is calculated by taking the free cash flow per share divided by the share price. Fund holdings and sector allocations are subject to change at any time and are not recommendations to buy or sell any security. Fund holdings exclude short term holdings. References to other funds should not be interpreted as an offer of these securities.

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating™ for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating™ metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. The Prospector Opportunity Fund was rated 4-Stars and 3-Stars against the following numbers of Mid Cap Value funds over the following time periods: 341 and 301 funds in the last three- and five-year periods respectively.
